Fifteenth Birthday Presentation
(A surprisingly varied year.)

Demos and presentations

As last year, we had quite a few of these, including:

- From Brian: Veracrypt, a Comtrend AR-5387un DSL router (from a skip) and Alexa

- From Bernie: GIMP, Docker and cooperative multitasking using Python asyncio

Demos and presentations

- From David: a self-booting stack for Slackware, a USB voltage/current reader, several ESP32 SOCs, *Le potato* and his 3D printer upgrades

-

Darren shared

- Mongo

- Open Refine

- The Python Data Analysis Library

- His project with Kdialog

- His use of AWK

Brian shared

- Home assistant + tailscale

- Oracle Cloud Free Tier

- NixOS

- Ulanzi clock

Bernard shared

- Test Driven Development

- Secret genius of modern life

- Development of number systems

While Nick shared his Christmas book list

John shared

- A talk by Tim Berners-Lee on the Solid Project

- HP's new direct supply of cartridges for its wireless printers

- Installing Let's Encrypt certificates (thanks to help from David)

- SUSE's Aeon – containerised desktop project

We also shared

- Experiences of Mastodon

- Using yt-dlp rather than youtube-dl

- Transcoding files using KDElive

- Darktable underlying DigiKam

- The arrival of XHTML5

We also shared

- Array programming

- CASE statements

- Outliners (for source code)

- dBASE

- The 'original' PIP

That's all, folks
